

One of the best vacuum pumps available

- Six models from 40 lpm (1.44 cfm) to 273 lpm (9.64 cfm)
- Dual stage for maximum performance and deep vacuum power
- Dual voltage and dual cycle - 220V/50Hz and 110V/60Hz
- Single pole switch for easy voltage changing
- Gas ballast valve to minimise moisture condensing and reduce evacuation time
- Lifting / security eye built in to handle
- Equipped with thermal and electrical overload protection
- Electrically operated solenoid valve to maintain vacuum in the event of power failure
- Fitted vacuum gauge to monitor evacuation
- Supplied with oil mist filter to minimise oil vapour release to atmosphere
- Fitted with non return valve on the inlet to prevent oil being drawn into the system
- 1/4" and 3/8" SAE Connections

Professionals only choose the best tools
