LOCKING PINCH-OFF AND PIERCING PLIERS

PT-109 LOCKING PINCH-OFF and PIERCING PLIERS

Line piercing/refrigerant recovery tool pierces, seals and locks on to copper lines in one swift motion.

FEATURES

- Self adjusting. No need to adjust the tool for different sizes of tubing. The patented tension system automatically locks pliers on copper tubing $\frac{1}{4}$ " to $\frac{1}{2}$ " (6 mm – 12 mm) OD tubing.
- Replaceable hardened, stainless steel pierce and brass valve assembly.
- 90° elbow brass valve & extension tube eliminates tangling and interference problems.
- Durable: made with high carbon, heat treated, steel jaws.

VG-12

ITE LOCKING PIERCING PLIER

Adjustable from $\frac{1}{4}$ " (6 mm) up to $\frac{7}{8}$ " (22 mm)
Just pierce any charging tube to immediately evacuate or charge your system. Then use the VG-10, pinch behind the VG-12, remove it and braze the tube. With changeable PIERCING NEEDLE and ready to use $\frac{1}{4}$ " flare SAE ACCESS VALVE.
Replacement spare needle & gasket for VG-12.

VG-12ING

VG-14

LOCKING PIERCING PLIER

Adjustable from $\frac{3}{16}$ " (5 mm) up to $\frac{1}{4}$ " (6 mm).

VG-14G

Spare gasket for VG-14

VG-14I
