

## PRESSURE CONTROL VALVE

**OPCV-1400** PRESSURE CONTROL VALVE,  $\Delta p$ : 1,40

- This control valve is installed between the oil receiver and the suction line. It must be installed on the  $\frac{3}{8}$ " male flare connection of the oil receiver.
- Ensures a pressure differential of 1,4 bar between the oil receiver and the suction line and allows a correct oil supply for the oil level controls.
- Connection Inlet:  $\frac{3}{8}$ " female flare  
Outlet:  $\frac{3}{8}$ " male flare
